

VIKRAM SADASHIV WAGHMARE

DevOps Engineer | AWS | Terraform | Jenkins | Docker | Kubernetes | Ansible | Prometheus | CI/CD

📍 Pune, Maharashtra | 📞 +91 9890066071 | ✉️ vikramwaghmare210@gmail.com | 🔗 LinkedIn

PROFESSIONAL SUMMARY

DevOps Engineer with 4 years of hands-on experience in AWS Cloud, CI/CD Automation, Infrastructure as Code (IaC), Containerization, and Cloud Security. Skilled in designing and managing scalable deployment pipelines using Jenkins and GitLab CI/CD, automating cloud infrastructure using Terraform and Ansible, and managing containerized applications using Docker and Kubernetes.

Experienced in AWS services including EC2, VPC, S3, IAM, Route 53, ELB, EFS, Auto Scaling, CloudFront, CloudTrail, SNS, and CloudWatch. Strong expertise in infrastructure monitoring, cloud governance, deployment automation, and production support within Agile environments. Proficient in Python and Shell scripting for operational automation, incident resolution, and deployment management. Strong team player with excellent troubleshooting and problem-solving skills, with domain experience in banking and financial services applications.

SKILLS & EXPERTISE

- **Cloud:** AWS (EC2, S3, VPC, IAM, RDS, Route 53, ELB, EFS, CloudFront, SNS, Auto Scaling, CloudWatch)
- **IaC & Config:** Terraform, Ansible
- **Monitoring:** Prometheus, Grafana, CloudWatch, CloudTrail
- **On-Prem & Hybrid Infra:** Data Center, Hybrid Cloud, Networking
- **Networking:** VPC, NAT Gateway, Security Groups, IAM Policies
- **CI/CD:** Jenkins, GitLab CI/CD, GitOps
- **Containers:** Docker, Kubernetes, Helm
- **Scripting:** Python, Shell Scripting
- **Operating Systems:** Linux, Windows
- **Middleware:** Nginx, Apache, App Servers, IBM MQ, Solace
- **Data & Tools:** MySQL, SQL, Git, Jira, Confluence

PROFESSIONAL EXPERIENCE

DevOps Consultant at Ernst & Young (EY)

Aug 2025 – Present

Client: Bank of America

- Architect and manage enterprise-grade CI/CD pipelines using Jenkins, enabling automated deployments across multiple environments and reducing manual intervention for 10+ application teams.
- Provision and govern AWS cloud infrastructure using Terraform and IaC best practices, supporting critical banking workloads with 99.9% uptime.
- Oversee Kubernetes cluster operations including Deployments, Services, Ingress, ConfigMaps, HPA, and Namespaces implementing scaling strategies that improved application availability by 30%.
- Docker containerisation and microservices orchestration for 8+ banking applications, streamlining environment consistency from Dev to Production.
- Build and maintain observability stacks with Prometheus, Grafana, and AWS CloudWatch, and CloudTrail, reducing mean time to detect (MTTD) incidents by ~40% through proactive alerting.
- Collaborated with security teams to enforce IAM policies and cloud governance aligned with Bank of America's security standards.
- Automate operational tasks via Python and Shell scripting, repetitive manual workflows & saving an estimated 15+ engineering hours per week.
- Lead zero-downtime deployment strategies including rolling updates and blue-green deployments, supporting high-frequency release cycles for production banking applications.
- Troubleshooting deployment failures, infrastructure issues, and critical production incidents.
- Participate in Agile sprint planning, release validation, & retrospectives ensuring alignment between engineering and business stakeholders.

DevOps Engineer at Accenture

Sep 2022 – Aug 2025

Client: Barclays

- Developed and optimized CI/CD pipelines using Jenkins and GitLab - improved deployment speed by 50% and release efficiency by 300%.
- Automated AWS provisioning with Terraform and used Ansible for configuration across 50+ servers, reducing provisioning time by 60%.
- Built and deployed Dockerized microservices with Kubernetes and Jenkins, reducing environment setup time from days to hours.
- Implemented centralised monitoring and logging with Prometheus, Grafana, improving production visibility and supporting SLA compliance.
- Implemented secure networking using ALB, Route 53, CloudFront, NAT Gateway, IAM policies, and Security Groups.
- Reduced cloud costs by 20%: Optimised AWS resource utilisation through right-sizing and scheduled automation.
- Enabled blue-green and canary deployment strategies with smoke testing to minimize production downtime.
- Developed Python and Shell scripts for deployment automation, server maintenance, and operational tasks, reducing manual effort by 35%.
- Configured declarative Jenkins pipelines for automated build, test, and deployment workflows across banking applications.
- Performed server health checks, log analysis, and troubleshooting for production environment stability.
- Participated in INC management, root cause analysis (RCA), critical production activities maintaining 99.95% uptime for Barclays' banking services.
- Collaborated with cross-functional Agile teams to deliver weekly production-ready releases.
- Documented DevOps workflows, deployment procedures, and troubleshooting guides using Confluence and Jira.

EDUCATION

B.E. in Information Technology | Savitribai Phule Pune University | **88.64%**

Sep 2019 – Jun 2022

Diploma in Computer Engineering | Maharashtra State Board of Technical Education (MSBTE) | **75.00%**

Jun 2016 – May 2019

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner | Issued 2025
- Accenture ACE Award — recognised for outstanding performance and high-impact project contributions in banking DevOps.
- Successfully contributed to enterprise-scale banking and financial domain DevOps projects across Barclays and Bank of America.
- Improved deployment efficiency & reduced release timelines through CI/CD automation, directly supporting business continuity goals.
