

VIKRAM SADASHIV WAGHMARE

DevOps Engineer | AWS | Terraform | Jenkins | Docker | Kubernetes | Ansible | Prometheus | CI/CD

Pune, Maharashtra | +91 9890066071 | vikramwaghmare210@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

DevOps Engineer with 4+ years of hands-on experience in AWS Cloud, CI/CD Automation, Infrastructure as Code (IaC), Containerization, and Cloud Security. Skilled in designing and managing scalable deployment pipelines using Jenkins and GitLab CI/CD, automating cloud infrastructure using Terraform and Ansible, and managing containerized applications using Docker and Kubernetes.

Experienced in AWS services including EC2, VPC, S3, IAM, Route 53, ELB, EFS, Auto Scaling, CloudFront, CloudTrail, SNS, and CloudWatch. Strong expertise in infrastructure monitoring, cloud governance, deployment automation, and production support within Agile environments. Proficient in Python and Shell scripting for operational automation, incident resolution, and deployment management. Strong team player with excellent troubleshooting and problem-solving skills, with domain experience in banking and financial services applications.

SKILLS & EXPERTISE

Cloud: AWS (EC2, S3, VPC, IAM, RDS, Route 53, ELB, EFS, CloudFront, SNS, Auto Scaling, CloudWatch)

CI/CD: Jenkins, GitLab CI/CD

IaC & Config: Terraform, Ansible

Containers: Docker, Kubernetes, Helm

Monitoring: Prometheus, Grafana, CloudWatch, CloudTrail

Scripting: Python, Shell Scripting

Networking: VPC, NAT Gateway, Security Groups, IAM Policies

Data & Tools: Databricks, SQL, Git, Jira, Confluence

PROFESSIONAL EXPERIENCE

Consultant at Ernst & Young (EY)

Aug 2025 – Present

Client: Bank of America

- Designing and managing CI/CD pipelines using Jenkins for automated application deployments.
- Provisioning and managing AWS cloud infrastructure using Terraform and Infrastructure as Code (IaC) practices.
- Managing Kubernetes workloads including Deployments, Services, Ingress, ConfigMaps, and Namespaces.
- Supporting Docker containerization and orchestration for microservices-based applications.
- Implementing infrastructure monitoring and alerting using Prometheus, Grafana, and AWS CloudWatch.
- Collaborating with security and compliance teams to enforce IAM policies and cloud governance standards.
- Troubleshooting deployment failures, infrastructure issues, and critical production incidents.
- Automating operational tasks using Python and Shell scripting to improve efficiency and reduce manual effort.
- Implemented Kubernetes scaling and resource optimization strategies to improve application availability and cluster performance.
- Participating in Agile ceremonies, release planning, deployment validation, and operational support activities.
- Worked on deployment strategies including rolling updates and zero-downtime deployments for production applications.

DevOps Engineer at Accenture

Sep 2022 – Aug 2025

Client: Barclays

- Developed and optimized CI/CD pipelines using Jenkins and GitLab - improved deployment speed by 50% and release efficiency by 300%.
- Automated AWS infrastructure provisioning using Terraform (EC2, VPC, S3, IAM, RDS, Auto Scaling); used Ansible for configuration management.
- Built and deployed Docker containers; deployed microservices on Kubernetes clusters integrated with Jenkins for continuous delivery.
- Configured monitoring and centralized logging using Prometheus, Grafana, AWS CloudWatch, and CloudTrail.
- Implemented secure networking using ALB, Route 53, CloudFront, NAT Gateway, IAM policies, and Security Groups.
- Optimized AWS resource utilization through right-sizing and scheduled automation, reducing cloud costs by 20%.
- Enabled blue-green and canary deployment strategies with smoke testing to minimize production downtime.
- Developed Python and Shell scripts for deployment automation, server maintenance, and operational tasks.
- Configured Jenkins pipelines using declarative scripts for automated build, test, and deployment workflows.
- Performed server health checks, log analysis, and troubleshooting for production environment stability.
- Participated in incident management, root cause analysis (RCA), and critical production support activities.
- Collaborated with cross-functional Agile teams to deliver weekly production-ready releases.
- Documented DevOps workflows, deployment procedures, and troubleshooting guides using Confluence and Jira.

EDUCATION

B.E. in Information Technology

Sep 2019 – Jun 2022

Savitribai Phule Pune University - **88.64%**

Diploma in Computer Engineering

Jun 2016 – Jun 2019

Maharashtra State Board of Technical Education (MSBTE) - **75.00%**

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner | Issued 2025
- Accenture ACE Award, Received for outstanding performance and project contributions
- Successfully contributed to enterprise banking and financial domain DevOps projects
- Improved deployment efficiency and reduced release timelines through CI/CD automation initiatives
