

MRUNAL NIMBALKAR

DevOps Engineer | AWS | Terraform | Jenkins | Docker | Kubernetes | Python | Ansible | Prometheus | CI/CD

Pune, Maharashtra | +91 9604744273 | mrunalnimbalkar13032001@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of hands-on experience in AWS Cloud, CI/CD Automation, Infrastructure as Code (IaC), Containerization, Cloud Security, and Serverless Automation. Skilled in designing and managing scalable CI/CD pipelines using Jenkins and GitLab CI/CD, automating cloud infrastructure using Terraform and Ansible, and managing containerized applications using Docker and Kubernetes.

Experienced in AWS services including EC2, VPC, S3, IAM, Route 53, ELB, EFS, Auto Scaling, CloudFront, CloudTrail, SNS, CloudWatch, and AWS Lambda. Strong expertise in infrastructure monitoring, cloud governance, deployment automation, serverless solutions, and production support within Agile environments. Proficient in Python and Shell scripting for operational automation, deployment management, infrastructure optimization, incident resolution, and AWS Lambda-based automation workflows. Strong team player with excellent troubleshooting and problem-solving skills, with domain experience in banking and financial services applications.

SKILLS & EXPERTISE

- Cloud:** AWS (EC2, S3, VPC, IAM, RDS, Route 53, ELB, EFS, CloudFront, SNS, Auto Scaling, CloudWatch)
- IaC & Config:** Terraform, Ansible
- Monitoring:** Prometheus, Grafana, CloudWatch, CloudTrail
- Networking:** VPC, NAT Gateway, Security Groups, IAM Policies
- CI/CD:** Jenkins, GitLab CI/CD
- Operating Systems:** Linux, Windows
- Containers:** Docker, Kubernetes, Helm
- Scripting:** Python, Shell Scripting
- Data & Tools:** MySQL, SQL, Git, Jira, Confluence

PROFESSIONAL EXPERIENCE

DevOps Engineer at VIAVI Solutions

Aug 2023 – Present

- Designed and managed CI/CD pipelines using Jenkins and GitLab CI/CD for automated build, test, and deployment workflows, improving deployment speed by 50% and release efficiency by 300%.
- Provisioned and managed AWS cloud infrastructure using Terraform and Infrastructure as Code (IaC) practices across services including EC2, VPC, S3, IAM, RDS, Auto Scaling, ALB, Route 53, CloudFront, and NAT Gateway.
- Managed Kubernetes workloads including Deployments, Services, Ingress, ConfigMaps, Namespaces, scaling strategies, and resource optimization to improve application availability and cluster performance.
- Built and deployed Docker containers for microservices-based applications and integrated Kubernetes deployments with Jenkins for continuous delivery.
- Implemented deployment strategies including rolling updates, blue-green deployments, canary releases, and smoke testing to ensure zero-downtime production deployments.
- Configured infrastructure monitoring, centralized logging, and alerting using Prometheus, Grafana, AWS CloudWatch, and CloudTrail.
- Collaborated with security and compliance teams to enforce IAM policies, Security Groups, and cloud governance standards.
- Developed Python and Shell automation scripts for AWS infrastructure management, CI/CD workflows, deployment automation, server maintenance, log analysis, health checks, backup operations, and operational tasks, improving efficiency and reducing manual intervention.
- Automated AWS operational activities using Python scripts and AWS Lambda functions for EC2 monitoring, S3 backup management, CloudWatch integrations, resource cleanup, scheduled automation tasks, and deployment validation processes.
- Developed and deployed serverless automation solutions using AWS Lambda integrated with CloudWatch Events, S3 triggers, and IAM roles to streamline operational workflows.
- Integrated Python-based automation with Jenkins pipelines, Terraform workflows, Kubernetes operations, and AWS services to streamline cloud provisioning, application deployments, and release management.
- Utilized Python scripting for troubleshooting, automation job monitoring, incident resolution, and infrastructure optimization in AWS and Kubernetes environments.
- Optimized AWS resource utilization through right-sizing and scheduled automation, reducing cloud costs by 20%.
- Performed server health checks, log analysis, troubleshooting, debugging, incident management, root cause analysis (RCA), and critical production support activities.
- Worked in an Agile/Scrum environment and participated in sprint planning, defect triaging, release planning, deployment validation, and continuous improvement initiatives.
- Collaborated with cross-functional teams including QA, application, infrastructure, and security teams to deliver production-ready releases and automation solutions.
- Documented DevOps workflows, deployment procedures, operational runbooks, and troubleshooting guides using Jira and Confluence.

EDUCATION

B.E. in Computer Science | Savitribai Phule Pune University | **9.16 CGPA**

Sep 2019 – Jun 2023

Higher Secondary Certificate | MSBSHSE | **76.00%**

Jun 2018 – May 2019

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner | Issued 2025
- Received VIAVI Most Purplished Person Award for outstanding performance and project contributions
- Successfully contributed to enterprise banking and financial domain DevOps projects
- Improved deployment efficiency and reduced release timelines through CI/CD automation initiatives
